PROFESSIONAL SUMMARY

I currently work as a Machine Operator & a Freelance web developer, but my passion is web development as I was a Web Applications Developer for most of my professional career. I'm a solution-driven professional excelling in highly collaborative work environment finding solutions to challenges and focused on customer satisfaction. Proven experience developing consumer-focused web sites using HTML, CSS and JavaScript, Angular, React, AngularJS, C# and SQL. Experience building products for desktop, phone and mobile app users, meeting highest standards for web design, user experience, best practices, usability and speed. Responding to challenges by designing and developing solutions and building web applications aligned to customer's services.

WORK HISTORY

CommScope - Machine Operator

CATWABA, United States • 06/2020 - Current

Perform physical manipulation or movement of product or materials, machine operations or other jobs as deemed vital by business demands. This includes operating primary extruder to apply an insulating compound to the wire in accordance with engineering specifications and standard quality production procedures maintaining finished product dimensions between tolerance ranges specified. Setting up extruder to include setting heat controls, selecting accurate extrusion tools, cooling devices and the compound and wire supply specified. Setting up and operating all required support equipment. Assist other operators in start-up, shut-down and change over procedure. Perform quality control checks on wire supply and finished wire to include adhesion, air leaks, correct size, eccentricity, and wall thickness. Supervise capacitance on wire. Take initiative when there is a problem by using my own skills and troubleshooting. Call technicians when needed. Execute all reports supplying information to needed areas on product produced. Work closely with R & D Engineering on developing new products and evaluating new raw materials and with other teams on goal-oriented projects. Engage in Research and Development activities either in direct support or direct supervision.

Newton • 06/2002

High School Diploma

Kings College

Charlotte • 05/2004

Diploma: Computer Programming

Central Piedmont Community College

Charlotte • 08/2005

**Web Development Classes
& Adobe Web Applications**

ProtoAdmin

Mocksville, NC • 09/2016 - Present

<http://protoadmin.com/>

I needed a solution to manage my clients. I created this application to add, edit and delete clients. I also built-in functionality to add, edit, view, email and delete invoices. My goal with this project is not only use for my business use but continue to add functionality and hopefully use this application to sell for other businesses or freelance developers that's looking for an admin dashboard starting point. I developed this using HTML, CSS, Bootstrap, JavaScript and PHP. Long term I intend to use Azure or AWS for hosting but will wait until it's profitable to do so.

Selectify

Mocksville, NC • 04/2019 - 09/2020

<http://selectify.me/>

I created a solution for home builders to allow their customers a web application interface for their home product selections. This includes selections for brick, roofing, appliances, exterior veneer, cabinets, countertops, doors, lighting, flooring and paint. Home builders can then view selections made by the customers on their accounts. I created an Apple App Store application to allow users to access the platform easier. All of this was developed using HTML, CSS, SASS, Bootstrap, jQuery, JavaScript, Xcode and PHP.

Mirror Image Cleaning

Mocksville, NC • 02/2020 – 04/2020

<http://mirrorimagenc.com/>

This client has a professional cleaning business. They needed a very clean and professional looking site to represent their business. This was achieved by simply, HTML, CSS, Bootstrap, jQuery, JavaScript and PHP. We are still in development on this project waiting on content to be written.

Stillwater Homes, Inc

Yadkinville, NC • 09/2019 - 11/2019

<http://stillwaterhomes.sidneyphillip.com/>

This client is a custom home builder. They needed a very clean and professional looking site to represent their business. This was achieved by simply HTML, CSS, Bootstrap, jQuery, JavaScript and PHP.

Cogar Decoys

Mocksville, NC • 01/2019 - 05/2019

<http://cogardecoys.com/>

This client builds custom duck decoys for national tournaments. The owner is considering turning this site into an ecommerce front-end website for purchasing duck decoys. This will require a custom content management system back-end that will allow admin access to update products, view orders and track invoices, etc. I developed this using HTML, CSS, JavaScript and PHP.

Smith Reynolds Airport

Winston-Salem, NC • 04/2018

<http://smithreynolds.org/>

The airport needed a complete redesign as their website was 10 years old. I gave them a custom WordPress design while utilizing WordPress for the content management system.

EMA Resources, Inc.

Mocksville, NC • 01/2018

<http://emaresourcesinc.com/>

EMA Resources needed a fresh new look so I developed a website using HTML, CSS, JavaScript and PHP.

His & Hers

Mocksville, NC • 06/2017

<http://hisandhersnc.com/>

His & Hers is a band located in Winston-Salem NC. They needed a website to allow users to find contact information, performance dates, portfolio pictures, sell music and stream their latest songs. I developed this using HTML, CSS, JavaScript and PHP.

Douthit Electrical

Mooresville, NC • 01/2017

<http://de.sidneyphillip.com/>

Douthit Electrical needed a new website for allowing customers to request appointments and gain more information about the company. I developed this using HTML, CSS, jQuery, JavaScript and PHP.

Stonewall Consulting

Statesville, NC • 11/2016

<http://stonewall.sidneyphillip.com/>

My partner and I started a web development consulting firm. We needed a website to allow potential customers to find out about us. This included an SEO rich website with Analytics and AdWords campaign. We developed this using HTML, CSS, JavaScript and PHP.

CabinFree.com

Mooresville, NC • 06/2016

<http://cabinefree.com/>

This client had a lake house and mountain house for rent. They needed a way for customer and family members to schedule trips. The front-end is a basic calendar that allows the user to select a day and fill out a quick form. This generates two emails, one to the user confirming the details of the trip and one to the admin. On the back-end the admin has the ability to view all requests and can approve/deny. Each option then emails the user the results. I developed this using HTML, CSS, jQuery UI, jQuery, JavaScript and PHP.

Stillwater Homes, Inc. – Communications Officer

Yadkinville, NC • 02/2019 - 11/2019

Managed our customer selection process for our clients which included: door styles, window patterns, brick selection, roofing material etc. I coordinated meetings and selections with our cabinet and tile/flooring vendors. I managed pricing for new customers as well as sales meeting with them. I lead the sales team for potential customers with face to face meetings.

Aon – Sr. Web Applications Developer

Winston-Salem, NC • 09/2014 - 04/2018

Managed our employee benefits outsourcing applications. We allowed large corporations to allow employees to login and make benefits choices. I managed a group of developers using Microsoft stack with Angular for the front-end development, C# for the back-end development and SQL for the database management. The admin applications used widgets to allow our business users to edit different views per admin user based on their role. We managed our application using Azure.

Aon – Web Applications Developer

Winston-Salem, NC • 05/2011 - 09/2014

Managed our employee benefits outsourcing Kentico application. My job in this role consisted of converting photoshop files into Kentico websites. Frequently created custom macros using K#. Also used C# on the back-end to allow more custom features on front-end.

Aon - Web Developer

Winston-Salem, NC • 09/2008 - 04/2011

Managed our employee benefits out-sourcing inhouse application HRPortal. My role was to create website based on the limitations of the system. I used HTML, CSS and JavaScript to create user interfaces for employee to elect benefits. I also introduced Google Analytics for tracking employee data. I created widgets for our internal business to easy read the data reports.

United Insurance. – Life & Renters Insurance Agent

Charlotte, NC • 08/2007 - 08/2008

I collected premiums for our existing clients in my district. I cold called potential clients by phone and door to door for Life insurance and Renters insurance.

AOPD – Windows Application Developer Consultant

Charlotte, NC • 08/2007 - 08/2008

AOPD needed a custom application for automation for hours and hours of endless excel and database manipulation. I developed a VB6 program that automated the time needed to complete the project in 5 minutes.

Forms & Supply, Inc. - Sales Technology Specialist

Charlotte, NC • 01/2005 - 08/2007

Here I managed the Goldmine applications. I also developed plugins that integrated our DDMS which I could pull countless reports into an UI that allowed our sales rep to have all of our client information in one place instead of using multiple systems. I used HTML, CSS, JavaScript, Flash, C# and SQL database for the custom plugins.

Carolina Realty – Web Developer

Charlotte, NC • 06/2004 - 12/2004

Carolina Realty was in much need of a website presence. I developed a basic website but added a custom MLS system. This allowed users to review all MLS listing throughout the state of North Carolina.
